

AUSVET

# VETERINARY EPIDEMIOLOGY MASTERCLASS

**Monday 1– Friday 5 APRIL 2019**  
(LUNCHTIME START ON MONDAY AND LUNCHTIME FINISH ON FRIDAY)

*Do you want to protect animals from disease, ensure food security and promote safe trade in food and animal products? Applied epidemiology is critical to meet these challenges. Please join us for an exciting masterclass to learn and discuss core epidemiological principles and concepts and how to apply these in your field.*

## Overview

This course is suitable for those with a baseline knowledge of epidemiology, such as:

- government staff and private practitioners
- graduate students wishing to increase their understanding of epidemiology
- Australian and New Zealand College of Veterinary Scientists (ANZCVS) membership candidates.

Our course will cover much of the content of the ANZCVS Veterinary Epidemiology chapter membership guidelines with a focus on the most important principles, challenging concepts, real-world application and examples.

Please contact [canberra@ausvet.com.au](mailto:canberra@ausvet.com.au) to express interest or to ask a question. A detailed course program will be made available mid-January 2019.

## Presenters

Our presenters apply epidemiology to disease issues in a broad range of species – from cattle to oysters.

- Brendan Cowled BVSc PhD FANZCVS (Veterinary Epidemiology)
- Jonathan Happold BVSc MSc MANZCVS (Veterinary Epidemiology)
- Ashley Jordan BSc BVMS MANZCVS (Veterinary Epidemiology)

For presenter biographies please visit our website: [www.ausvet.com.au](http://www.ausvet.com.au)

## Cost

\$2,999 AUD (includes the textbook *Epidemiology for Field Veterinarians*)

## Venue

Canberra (venue TBA)

**RSVP BY 28 FEBRUARY 2019**
